

QUESTION 2

ESG Key Performance Indicators under GRI 11

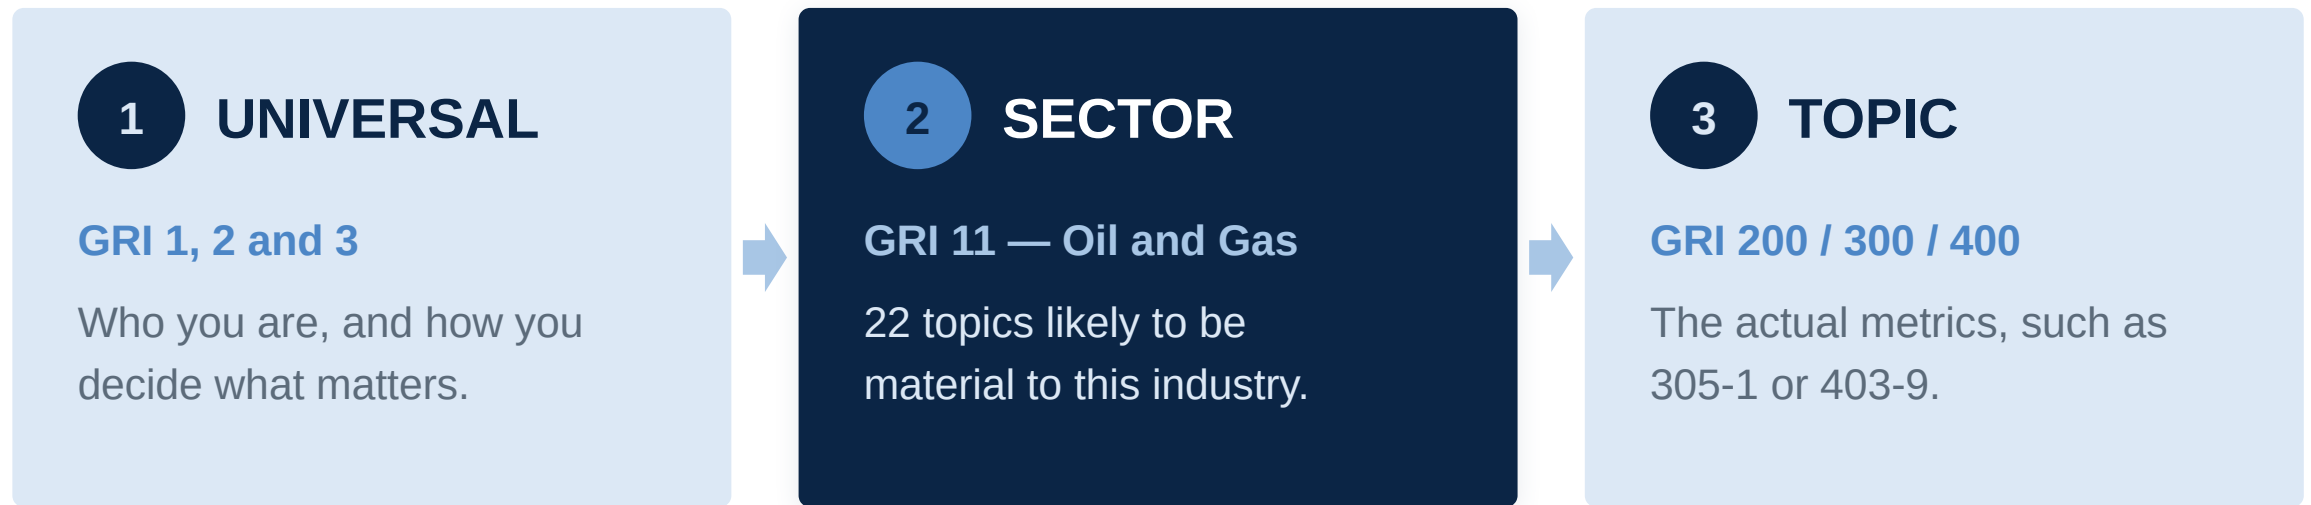

The 22 questions a refinery is not allowed to ignore — and the metrics that answer them.

GRI 11: Oil and Gas Sector 2021 · effective 1 January 2023

GROUP C (29 MEMBERS)

Three layers, used in order.

The sector layer is what makes the report about refining rather than about anything.

The report-or-explain rule

All 22 topics must be reviewed. Any you call immaterial must be listed, with the reason.

22 topics. For a refinery, most are material.

Grouped here for legibility; the standard numbers them 11.1 to 11.22.

ENVIRONMENT	SAFETY AND PEOPLE	SOCIETY	GOVERNANCE
11.1 GHG emissions 11.2 Climate transition 11.3 Air emissions 11.4 Biodiversity 11.5 Waste 11.6 Water and effluent 11.7 Closure	11.8 Asset integrity 11.9 Health and safety 11.10 Employment 11.11 Equal opportunity 11.12 Forced labour 11.13 Association	11.14 Economic impacts 11.15 Local communities 11.16 Land rights 11.17 Indigenous rights 11.18 Conflict/security	11.19 Anti-competitive 11.20 Anti-corruption 11.21 Payments to govt. 11.22 Public policy

 Always material at a refinery — the rest depend on the site, and each must be justified.

The metrics that carry the report.

Every one has a GRI code, a unit and a named owner. No code, no credibility.

305-1/2/3 Scope 1, 2 and 3 emissions tCO₂e	305-4 GHG intensity tCO₂e / t crude	302-3 Energy intensity Solomon EII
Sector Flared and vented gas million Nm³	305-7 SO₂, NO_x, particulates, VOC tonnes / yr	303-3/5 Water withdrawal and consumption megalitres
306-3 Hazardous waste, spent catalyst tonnes	Sector Tier 1 process safety events count	403-9 Recordable injury rate per 200,000 h
204-1 Spend with local suppliers %	205-3 Confirmed corruption incidents count	207-4 Payments to governments ₦ million

The GHG inventory from Question 1 is the input. This is where it gets published.

WHAT ELSE EXISTS, AND HOW IT GETS SIGNED OFF

Different readers, same plant.

GRI + GRI 11

All stakeholders

NEITI

Citizens

Proof of what we
paid

GRI is the backbone. The others answer the same data to a different reader.

ASSURANCE

ISAE 3000 and ISAE 3410.

Limited assurance is the floor; reasonable is the
expectation.

THE TEST

**A report is judged by what it refuses
to leave out.**
